## Abstract

We solved an important problem, outperforming all previous attempts.

## 1 Introduction

- what is the problem
- what are the applications

## 2 Survey

All the solutions that have been proposed in the past! Example of citation: [1]

Table 1 gives a list of symbols used.

Symbol	Definition
$\pi$	3.14
$f$	frequency

Table 1: Symbol table

### 3 Proposed Method

Our proposed method is as follows: ...

### 4 Experiments

We implemented our method and compared it with the older ones. The results are very promising.

Figure 1 shows the results (and, actually, how to insert postscript files):

Figure 1: A fictitious dataset (a) and its performance plot (b)

### 5 Conclusions

The proposed method outperforms older approaches in speed and quality.
